# THE SIOUX GARDENS

T. E. Barber & Sons

Grand Forks, N. Dak., U. S. A.

The 1939 growing season surely brought out the good ones and cut down those not suitable for all kinds of weather conditions, with a severe drought the last half of July, August and September and with the worst infestation of grasshoppers during the spring and summer, the varieties that survived are worth having. Constant spreading of poison and overhead irrigation pulled us through. However, if any blooms from our 1939 crop come out with skull and cross bones on them don't be surprised as it will just be a hangover from the hopper poison. Next year will try and get some of J. D's. poems to scatter around the patch if the hoppers come back. Think they will work better than poison.

We are economizing on our list this year and expect to pass on the savings in our cash discount and extras sent gratis. We hope to continue with our illustrated sheet next season but that will depend greatly on the response you make with orders this season, as we do not issue a fall special to raise money to finance printing and mailing of the later catalogue.

A good growing season and many wins at the shows, and may our bulbs also give you much enjoyment in your gardens at home.

Thanks for orders in the past and may we continue to serve you this season.

At the Minnesota show some beautiful seedlings were shown. Outstanding was the collection shown by Arthur Koernor of Newport, Minnesota, consisting entirely of miniature, many appeared to be entirely double and were arranged very attractively into floral designs. He reports the demand for this type of bloom is very heavy from the florists in the Twin Cities.

A spike of Lord Selkirk took honors at the Minnesota show in the Court of Honor class over a very mediocre entry of some twelve blooms. Minnesota does not award a grand champion picked at large from all the winners at the show as many other societies do.

At the Winnipeg show, which was bigger and better than ever, many good seedlings were shown but none made the high score that was made in '37 and '38.

Aladdin scored the top honors this year at Winnipeg and was a beautiful spike. One spike of R. B. was shown that was late for the show. The second day it showed much better and in the A. O. C. I predict a fine future for this one from Vancouver.

We can recommend the Bennett originations very highly. Roses of Picardy, Killarney, Corinne, Glacier, Mavoureen, Sentinel, Lake Louise, and Victoria are all tall husky growers that do well under all conditions. Prince Rupert and Ramona have not quite the stretch as these others but are very good.

## Discounts

Due to the loss of so much stock and everything we had decided to eliminate all discounts in stock this year but as the catalogues come in with their attractive coupons and discounts (some even promise up to 60 percent additional stock on the large orders) we have decided to fall into line

with the racket and offer discounts in stock. (Who started this?) However, you will have to leave it to us to add the surplus from stock that is available. If additional stock of varieties ordered cannot be sent, then other stock will be added in amounts relative to the size of your order, that to be decided by us. Kindly request varieties desired for discount and we will fill if possible.

No orders for less than \$1.00 accepted and no single item less than 15c accepted. 25 percent cash secures order until shipping time and if you wish to pay express charges we will add extra stock to cover.

Prizes in bulbs donated at shows must be in varieties we have sufficient stock of and not the very late releases so list several varieties for us to choose from.

Our stock is free of thrip and disease. Substitutions will not be made unless requested. All stock guaranteed true as is humanly possible.
